Subject: RE: Red and Bonita Work - Pond Berm

Pete,

The figure shows the in-pond berm just south of the toe of the north embankment. If it's easier to just cut the berm in-place as you remove the 20 feet that's fine. The drawing shows the new berm (3rd one) as being just south of the existing toe of slope, but if you want to you could start the cut just 3 feet below the top of bank to start the berm (3 to 4 ft H) at the existing toe of slope that's fine too. Whichever is easier to build works.

Steve

Pete,

Please let us know when (which day/time) you plan to do the work on the pond at the R n B. Also, I will send you a drawing as to what we need specifically. Kirstin is going to be up there for us also.

Thanks,

Steve
